RBI9693T

AVIONICS MESURMENT AND MAINTENANCE KIT

PRODUCT DESCRIPTION

TThe RBI9693T set is designed to cover avionics testing and repair, combining our RBI9300T avionics test kits and our RBI9600T tool kit. It contains 68 pieces of conventional and Avionic-specific test and measurement equipment for use in the aviation service field and 262 Bahco and DMC avionics tools for avionics maintenance. The set contents which includes a DMM designed for avionic testing, and may also be used for insulation measurement, are contained within the case with each test component space labelled. This "Tool Control" facility is a vital part of the kit. The special Aero leads are displayed in one of the foam layers for initial visual inspection and can also be stored in the respective colour-coded tool rolls, which are supplied within the kit.
